

Educational Philosophy

We believe the M.S.A.D. #49 schools exist for our communities: Albion, Benton, Clinton and Fairfield.

Education is a life-long process. Therefore, it is our major challenge “To Provide Excellent Programs for Our Children.” This we accept as our trust. However, ALL of our citizens, from early childhood to senior citizens, have the right to grow into contributing members of the world community.

To achieve this, services and programs will promote dignity, knowledge and awareness of the world as individual and community needs require. In order to remain responsive to these needs, a close home-school-community relationship will be continually fostered. Through on-going communication and evaluation, programs will be monitored, adjusted, and created to meet the unique challenge of living in our respective communities as citizens of the world at large, today and tomorrow.
