

EXTENDED SCHOOL YEAR SERVICES FOR EXCEPTIONAL STUDENTS

Individual Evaluation Plans determinations to provide extended school year services shall be made based upon the likelihood that during school vacation periods a student is at risk of losing skills previously mastered and of being unable to recoup those skills within a reasonable time. The determinations to provide special education beyond the normal school year will be made on an individual basis. In providing extended-year services, M.S.A.D. #49 shall provide special education and related services to address only those areas of an exceptional student's Individual Education Plans in which that risk exists.
